
This is how one Celestial described my telepathic abilities in the late 1990's.

The description that the Celestials have given of a Senior Telepath is very

descriptive and accurate, and gives language to a new profession.

BEGIN: A Celestial remarked as follows about one of our Senior Telepaths:

CELESTIAL: I would have you know that in this entity there are good receptors. That is to say, there is an ability to grasp a theme and a thought, to listen, and to voice. This is exceptionally rare.

I love their command of our language.

The world has no idea that we have developed telepathy with the next dimension to the level that we have.

Love,

Helen
